Your three-city atlas

Birth record New York City, US / 1992-06-21 08:30 local

America/New_York / 1992-06-21 12:30:00 UTC

Sun
Moon
Mercury
Venus
Mars
Jupiter

At the selected instant, each line marks where a celestial body was on an angle. Read the world plate alongside the city pages to identify the nearest line and its traditional symbolism.

Straight lines mark upper and lower meridians. Curved lines follow the horizon. Lower-meridian and setting lines use dashes. White rings locate your three cities. The scalable world map is included in the ZIP.

Lisbon

PT / 38.725 latitude, -9.150 longitude

1. Sun / Upper meridian (MC)

182 km from this angular line. In astrological tradition, Sun symbolizes visibility and creative expression. The upper meridian angle brings this theme into a reading of public life and the roles you take on.

2. Venus / Upper meridian (MC)

385 km from this angular line. In astrological tradition, Venus symbolizes pleasure and connection. The upper meridian angle brings this theme into a reading of public life and the roles you take on.

3. Moon / Setting (DSC)

1,820 km from this angular line. In astrological tradition, Moon symbolizes belonging and daily rhythms. The setting angle brings this theme into a reading of one-to-one relationships and collaboration.

A question to take with you

Where would you like to be seen doing something you care about?

Tokyo

JP / 35.690 latitude, 139.692 longitude

1. Mercury / Setting (DSC)

1,145 km from this angular line. In astrological tradition, Mercury symbolizes conversation and learning. The setting angle brings this theme into a reading of one-to-one relationships and collaboration.

2. Moon / Rising (ASC)

1,348 km from this angular line. In astrological tradition, Moon symbolizes belonging and daily rhythms. The rising angle brings this theme into a reading of first impressions and personal beginnings.

3. Jupiter / Setting (DSC)

1,811 km from this angular line. In astrological tradition, Jupiter symbolizes curiosity and growth. The setting angle brings this theme into a reading of one-to-one relationships and collaboration.

A question to take with you

Who would you like to learn from, and how might you meet them?

Berlin

DE / 52.524 latitude, 13.411 longitude

1. Mercury / Upper meridian (MC)

184 km from this angular line. In astrological tradition, Mercury symbolizes conversation and learning. The upper meridian angle brings this theme into a reading of public life and the roles you take on.

2. Venus / Upper meridian (MC)

1,213 km from this angular line. In astrological tradition, Venus symbolizes pleasure and connection. The upper meridian angle brings this theme into a reading of public life and the roles you take on.

3. Sun / Upper meridian (MC)

1,366 km from this angular line. In astrological tradition, Sun symbolizes visibility and creative expression. The upper meridian angle brings this theme into a reading of public life and the roles you take on.

A question to take with you

Who would you like to learn from, and how might you meet them?

Compare the three cities

Lisbon / Sun MC

182 km. Use visibility and creative expression as a prompt for reflecting on public life and the roles you take on.

Tokyo / Mercury DSC

1,145 km. Use conversation and learning as a prompt for reflecting on one-to-one relationships and collaboration.

Berlin / Mercury MC

184 km. Use conversation and learning as a prompt for reflecting on public life and the roles you take on.

Use the comparison CSV to sort all 24 angular lines for each destination by distance. The nearest line can still be far away. There is no established distance at which an astrological effect begins or ends.

Method and limits

Astronomy Engine calculates geocentric apparent equatorial positions of date. Earth rotation sets each upper meridian. Rising and setting follow the geometric center of each body on a spherical horizon. Distances use a spherical Earth radius of 6,371 km. Refraction, lunar parallax, elevation, houses and line crossings are excluded.

An inaccurate birth time can shift the lines substantially. Historical time zones use the available civil-time records. The readings are symbolic entertainment and have no demonstrated predictive power. Use practical evidence when making travel or relocation decisions.
